Thermoboat Debuts Yachtsman Motor Mount Series

Mounts Reduce Vibration by 95 Percent

Sidney, British Columbia, August 25, 2010 – Marine hardware distributor [Thermoboat](#) today introduced its all-new [Yachtsman motor mount series](#). Designed for use aboard sail- and powerboats, Yachtsman mounts reduce engine vibration by up to 95 percent.

Available in models ranging from 77- to 800-pound-per-mount workloads, Yachtsman motor mounts are factory pre-loaded to appropriate load capacities to eliminate the need for adjustments over time. Further enhancing the mounts' long-term durability are Thermoboat's advanced polymer construction and gold-passivated zinc plating. The mounts are also oil- and fuel-resistant. With a tensile strength equal to 7,500 pounds per square inch (psi), Yachtsman mounts' failsafe design ensures that they will not degrade or fail even under the most inhospitable conditions.

Yachtsman motor mounts are available for purchase through selected dealers and distributors, and have a suggested retail price ranging from \$116.00 to \$323.00 USD.

[Thermoboat Ltd.](#) markets a full line of marine accessories from manufacturers including [StressFree Marine](#), [PolyFlex](#), [Powertrain Marine](#), [Prolan](#), [Marina Protection Systems](#), and [MultiPanel](#). Thermoboat is headquartered in Sidney, British Columbia, and distributes products throughout the United States, Canada, and Mexico.
